Getting Started

All Massey University students and staff have free access to the MyPortfolio system. Additional support is available to those in the College of Sciences but we will assist others as resources allow.

Try out an ePortfolio at:

<http://myportfolio.ac.nz/register.php>

ePortfolios to support and showcase your learning

ePortfolios allow students to display their best work in a way that sets them apart from the crowd by giving evidence of their many skills and abilities

<http://myportfolio.ac.nz>

What you can do with an ePortfolio

ePortfolios are great tools for supporting lifelong, self-directed learning.

Use your ePortfolio to showcase your skills, education and accomplishments to potential employers, graduate schools, or for class presentations.

The basic idea is that you add to your ePortfolio as you go through your studies. Add resources that you are proud of such as course reports, assignments, images, blogs, videos or audio recordings. When you have these resources collected, reflect on your learning and skills and set goals for the next stage of your learning. You might want to form a group of friends to share parts of your ePortfolio and exchange feedback. In the process of developing an e-portfolio, you will see the progression in your learning.

Benefits of ePortfolios

- Link the skills and experiences you develop in courses and postgraduate research
- Collect and store resources in a single place
- Review your course content and progress
- Learn by reflecting on what you have done using the evidence of your coursework and assignments
- Link the research skills you develop and showcase your research to others
- Give others an insight into your studies at university by showing examples of your work and share how you understand the material
- Develop self assessment skills and experiences
- Plan where and how to further develop your skills
- Showcase evidence of your experience to employers

What others are saying about ePortfolios

"To be successful in their future careers students need not only excellent subject knowledge - they also need to be great communicators, problem solvers and team players. ePortfolios are an ideal way for demonstrating such skills!"

Professor Janina Mazierska
Head of Institute
Information Sciences and Technology,
Massey University

"An ePortfolio will be a vital tool for making a good impression. It will give you a head start even before you sit down for an interview because as an employer I already will have a favourable opinion of you."

Russell Brebner
Financial Director
Unlimited Realities
