

## ePortfolio Competition for College of Science Students

### Entries

This competition addresses lifelong learning skills, reflections on content of studies and career plans. Entry into the competition is via an electronic portfolio, prepared according to one of three themes.

### Prizes

There are five prizes of \$80 each in the form of book vouchers.

This competition is open to all College of Science students at Massey University.

### Find out more

Go to the competition website:  
<http://sciences.massey.ac.nz/eportfolios/competition.asp>

### The three themes

#### 1) *My lifelong learning skills*

These are skills such as communication, teamwork, self-management and problem solving skills. Examine where you are in terms of developing these lifelong learning skills.

#### 2) *Content of my studies*

Look at the big picture of your subject area. Ask yourself how you would describe your studies to someone outside the university system. For example, explain how the different topics you are studying link together and why they are important.

#### 3) *Preparing for my future career*

Demonstrate your understanding of your future area of employment and show your thinking and involvement that goes beyond what is required directly for your studies. For example give an outline of your career plan, or a description of your skills and competences.

### Timeframe

Closing date for entries:  
19 October, 2008

Winners announced:  
10 November, 2008
